

Facebook HLR		
web based testing		
Functionality Id	functionality name	Description
101	check website link	it opens proper website
102	check website security	it shows website secure with Https
103	check website icon - text	it shows proper icon
104	click on website icon	it must be clickable and redirect to facebook index page
105	check click on email or phone number input field	it shows proper hover effect
106	check click on password filed	it shows proper hover effect
107	check password view icon	it shows proper view icon in password filed
108	check password click on view icon	when I click on view icon it shows all characters or unmasking password
109	check password field	when i write password in password field it masking with or *****
110	check click on login button - with empty input field	it must be shows proper error message
111	check click on forgotten password link	it redirects to find your account page
112	check click on create new account button	it redirects to register page
113	check click on browser back button - register	it shows proper dialogue box for go to back or continue register
114	check login button	it shows proper hover effect and it is clickable
115	check click on create a page for celebrity, bran or business	it should redirect to create a new page, and user must required login
116	check login with - invalid credential	when i enter email and password wrong it must be show proper error message, email and password is incorrect
117	check login with valid credential	it redirect home page
118	check login with valid email and invalid password	it shows proper error message for invalid field
119	ckeck login with invalid email and valid password	it shows proper error message for invalid field
120	check login with blank email and valid password	it shows proper error message for invalid field
121	check login with blank email and invalid password	it shows proper error message for invalid field
122	check login with valid email and blank password	it shows proper error message for invalid field
123	check login with invalid email and blank password	it shows proper error message for invalid field
124	check length of email and password field	length of email and password is as per specification
125	check tab key functionality	tab key should be working proper
126	check shift+tab key	shift+tab key should be works proper
127	check enter key of keyboard	enter key should be works proper
mobile based testing		
128	check website link -chrome	application should be proper open in mobile
129	check languauge dropdown	check langauge dropdown is working or not
130	check click on languag + icon	it shoudl be display all language list
131	check website icon	check icon is proper shows or not
132	check email/mobile number filed	it shows proper email/mobile number filed and shows proper hover effect or not
133	check password field	it shows proper password input filed or not it shows proper hover effect or not
134	check password view icon	check password view icon is visible or not
135	check password view icon click	check password view icon is cliackable or not
136	check password view icon hide text or not	check password view icon works or not
137	check login buton	check login button shows proper or not
138	check click on login button	check login butto is clickable or not
139	check forget password link	check forget passsword link is working or not

140	check browser back symbol	check back symbol is working or not
141	check create new account button	check create new account button is clickable or not
142	check cancel button	it should redirects to login pge
Responsive testing		
143	check website security	website must be secure with https
144	chek website icon with title	website icon must be show proper and text shold be clear
145	check email/mobile number text filed	check email/mobile number text filed is present on page
146	check password input text filed	check password inpur filed is present on page
147	check password view icon	check password view icon is present or not
148	check password hide icon	check password hide icon is present or not
149	check login button	check login button present on page or not
150	check forget password link	check forget passwrod lin is working or not
151	check create accont button	check create account button is working or not
152	check error message	check error message is proper dispaly or not for invalid credential
153	check text box or button and text is poper visible on screen	check textbox or button is responsive or not according to screen
